

Homework Problems

Certainly! Here are five algebra problems appropriate for 9th grade:

1. Solve for (x): ($3x - 7 = 2x + 8$).
2. Expand the expression: ($(x - 4)(x + 5)$).
3. Factor the quadratic: ($x^2 + 5x + 6$).
4. Simplify the expression: ($\frac{2x^2 + 8x}{4x}$).
5. Solve for (y): ($\frac{1}{3}y + 5 = \frac{2}{5}y - 2$).

Answers

Answer: 15

Answer: $x^2 + x - 20$

Answer: $(x + 2)(x + 3)$

Answer: $x + 2$

Answer: -35
